

RUBA Thermoplast AG

your top cap supplier &
professional toolmaker

PE-caps

Consumers of the cosmetic industry attach great importance not only to the aesthetic but also more to the sustainability. We also have dealt with this issue in detail.

We recommend to make a processing test before placing a definitive order.

The characteristics of the caps may vary depending on the PE-material. Based on our previous experience, **mat raw parts** made out of PE are clearly the better optical option. According to your individual needs we can help you to meet these challenges and test new materials for you.

We now also offer our caps in PE. This allows you to market a mono tube with a RUBA cap. We have successfully sampled the materials listed below:

PSabic M1053
HD-PE

Purell GB7250
HD-PE

Medical material, biocompatibility ISO 10993

HD4527 Terralene
Biobased PE
BCC (Biobased Carbon Content): 95%

Are you confronted with new customer requests?

We will be happy to help you meet these challenges and test other new materials for you. Would you like advice or samples? Just send us an email or give us a call.
